
Setting Alarm

Posted by powrus - 2012/06/17 08:58

Apologies for asking such a basic question which has probably been posted over and over but as a total newbie here and after reading prior posts I still do not understand how to set the 'advanced' alarm feature. For instance, if a meeting is scheduled for two weeks and I need to be alerted today, how to I set the alarm?

Replying to my own message here. Just as soon as I posted my question, I returned to the calendar "alarm" settings and everything became clear.

Sorry for the post.
