## Setting and Event

Posted by powrus - 2012/06/18 05:58

---

Why does my desktop calendar indicate a scheduled upcoming meeting (Event: with gray background)? There is no reference to other events scheduled the days before or the days after.

Why does it highlight that specific event?

Can you provide more detail describe about the problem event?  
e.g.: start time? end time? alarm? calendar setting? category? recurrence? and even post the problem's screenshot.

Thanks for replying. Here's info regarding the event:

Start Time: 1 PM  
End Time: 5 PM  
Alarm: 15 minutes  
Calendar: Default  
Category: Party  
Recurrence: None

PS: I don't know how to post the problem's screenshot.

Note: The desktop calendar continues to have a drop down highlighted area which alerts me that this event is scheduled ... even though I have another event scheduled the day before this one.

Hope I provided enough info.

Original Poster here: I cancelled all events prior to the one which has been highlighted via the drop down "event" box. Then, I re-entered an event for tomorrow. I now notice that the drop down "event" box makes reference to my event for tomorrow instead of the previous event scheduled for Saturday.

Am I right to assume that the drop down "event" box always displays the event which is scheduled to occur soonest? In other words, will I always be alerted to my next (closest) event? :huh:

Thanks.

Sorry, i can not determine there is a problem.

Some question:

the drop down "event" box is mean the "event list" window ?

which skin are you using ? shadow4 ?

and if possible, you can sent screenshot to me via email: [jhg5702@gmail.com](mailto:jhg5702@gmail.com)

Thank you for your response.

The problem I experienced (and posted here) has been resolved.
