Welcome to the forum, Sajel.

There is a similar question:

[www.rainlendar.net/cms/index.php?option=com\\_kunena&Itemid=42&func=view&catid=8&id=16898](http://www.rainlendar.net/cms/index.php?option=com_kunena&Itemid=42&func=view&catid=8&id=16898)

In your case, you need to change the Day Count value to 3.

EDIT: To set the current day on the center, you will then need to change the Today Position to 2. If you want it on the left, set to 1.

Here you have an addon for the original Shadow4 skin.

It will add an option to the Day View window to select the number of visible days.

You will have to increase the width to get a better view.
