## Rainlendar No Longer Loads on Start

Posted by Bast - 2012/06/24 09:39

---

I am running Windows 7 Home Premium. Two days ago, I got the blue screen of death and upon restarting Windows, my Rainlendar Pro 2.9 no longer starts when Windows starts. How can I fix this? I can manually start it, but I'd really like it to start when Windows starts.

Thanks for any help you can give me.

You can try:

1. Options... >> find and checked 'Enable on startup'.
2. If the 'Enable on startup' has been checked, first uncheck it >> press 'OK' to exit Options, then re-enter Options and checked it again.
3. If the automatic startup still doesn't work, please see this:

Try the solution proposed by anoob first for the "Enable on startup".

If it doesn't work, check the registry key: HKEY\_CURRENT\_USER\Software\Microsoft\Windows\CurrentVersion\Run
