## add Postponed status for tasks

Posted by scott w - 2012/07/03 13:59

---

Please add a "Postponed" status and a "Hide Postponed tasks" option.

When a project gets postponed (quite frequently), this would allow me to go through all of the project's tasks and set them to postponed. I could then hide the postponed tasks to clean up the todo list.

Unfortunately the iCalendar standard (RFC 2445) doesn't have postponed status. In theory adding a custom status could be possible but that also would create problems with 3rd party calendars since they don't support it.
