## Can I use Mozilla Thunderbird's calendars?

Posted by The Gadgeteer - 2012/07/15 14:44

---

I have some calendars and tasks that I was using with Thunderbird. I think they're in ICS format.

Anyone knows how could I integrate them with Rainlendar2?

Welcome to the forum, Gadgeteer.

Thunderbird is exclusively for email. I suppose you're talking about Lightning.

You can add the calendar with right click -> options -> calendars -> add... -> iCalendar format -> then search for the ICS file.

After created, you may want to check the option "Monitor changes" to keep them sync.
