
todo due date view

Posted by hoopdool - 2006/10/31 16:08

In the todo section the due date displays in the following format dd/mm/yyyy even if I set the options->advanced->DateFormat to %x or %m%d%Y.

Can anyone tell me how to get the date format to display mm/dd/yyyy

Currently a task will appear as follows

take dog for a walk

want it to appear as follows

take dog for a walk

Thanks

The due date seems to be hard coded to %x. I'll change it to use the user defined format.

Will the new code be in a new verison of rainlendar or can we modify it on our own?

It will use the same format as defined in Options->Advanced->DateFormat.
