## Skins -> Categories - no respond

Posted by Marque - 2012/08/08 20:08

---

Hello; i've licened and installed Rainlendar Pro (Ver. 2.10 (b120)) today and have following Problem when trying to edit skin-categories:

when pressing Options->Skins->Categories...: nothing happens, if language-setting ist "german"; (no errormessage)

it works fine with any other language (except russian -> same problem)

please help - i guess it's a bug, but i need this function in "german"

thank you

Welcome to the forum, Marque.

I test with "German", it's work fine.

About "Russian", It's just a translation-problem.

I compress "German" and "Russian" translation-language together, that I'm using, you can reinstall it and try again.

<http://www.rainlendar.net/cms/images/fbfiles/files/20120809fix.zip>

Install:

Download file > Change .zip to .r2lang > Drag file in Rainlendar window and drop.

Yes, thank you very much, that fixed the problem. :)

There is a difference in the size of the file: your rainlendar2.mo file was 91KB, my files was 98KB although file creation date was the same.

thnx!
