
Changing the weekend color

Posted by Andre Linoge - 2007/01/13 15:36

Good evening

I like to change the "standard" color of the weekends from pink into white, but this option is unusable in the calendar.xml. In the elements.xml its nowhere to be found. Does someone know how to change these setting??

TIA
Andre Linoge

Just remove the <weekends> and <exweekends> elements from the calendar.xml.
