
invalid plugins in rainlendarPro-2.10

Posted by cib - 2012/08/17 12:33

Hey there, I am getting the "invalid plugins found"-error when using Rainlendar-Pro-2.10-amd64.tar.bz2 under gentoo. The Problem still persists when using the latest beta, however Rainlendar-Pro-2.9-amd64.tar.bz2 works fine.

I get the following errors on 2.10:

```
cib@sobile rainlendar2]$ ./rainlendar2
./rainlendar2: /usr/lib64/liblber-2.4.so.2: no version information available (required by ./rainlendar2)
./rainlendar2: /usr/lib64/libcrypto.so.1.0.0: no version information available (required by ./rainlendar2)
./rainlendar2: /usr/lib64/libssl.so.1.0.0: no version information available (required by ./rainlendar2)
./rainlendar2: /usr/lib64/libssl.so.1.0.0: no version information available (required by ./rainlendar2)
./rainlendar2: /usr/lib64/libldap_r-2.4.so.2: no version information available (required by ./rainlendar2)
```

rainlendar2.log attached <http://www.rainlendar.net/cms/images/fbfiles/files/rainlendar2-25bcfa0fad2b376fec6ca4fcf493b59a.log>

You need to upgrade to openssl 1.0.1.
