## Icon displaying the 'date' in menubar Ubuntu

Posted by J.One - 2012/08/18 04:35

---

The icon in Rainlendar that displays the 'date' in the Ubuntu menubar doesn't always appear in the same way. Sometimes, or most of the time it has a white background, and this is really ugly. And on my notebook its the same, sometimes its even black without changing any settings.

This should be fixed already in the latest beta versions.

Yes, I never thought it would be fixed so fast. (great job!) :)  
Thank you!

I have two other things I'd like to mention but I will make a new topic to keep it clear.
