## Can't edit task details

Posted by jeantags - 2012/08/24 11:35

---

I can't type in the details box for tasks. I can for events. Please advise.

The calendar where you are trying to save the task probably doesn't support task descriptions.

I am using remember the milk and it's the TASKS list on Rain-lender (not the events). I can edit and add description on the events just not the TASKS.

The description field for RTM tasks is not supported in Rainlendar because it is used to store other information.
