
Windows 7 crash - Do not send dialog

Posted by sensor - 2012/08/28 08:43

Hello I have been using Rainlendar for some time now.

I recently updated to the newest version. There were no problems for a week, but today occasionally it crashes (3-4 times) without my interaction. I'm guessing during sync (I have Toodledo, Google Cal, Facebook birthdays). Here is the windows event log about it if it helps in some way. I'm not sure what this .dll is responsible for. I now started ProcDump but I will have to wait until it happens again.

Faulting application name: Rainlendar2.exe, version: 2.10.0.0, time stamp: 0x4ff14991
Faulting module name: wxbase28u_xml_vc_rny.dll, version: 2.8.11.0, time stamp: 0x4d04aab9
Exception code: 0xc0000005
Fault offset: 0x000013d0
Faulting process id: 0xb30
Faulting application start time: 0x01cd8515ef5e85ec
Faulting application path: C:\Program Files (x86)\Rainlendar2\Rainlendar2.exe
Faulting module path: C:\Program Files (x86)\Rainlendar2\wxbase28u_xml_vc_rny.dll
Report Id: 97ffcbc0-f111-11e1-9c7e-d0fa757353f1

If there is no useful information or not related - feel free to delete the thread or if you need some more information ;)

Cheers,
Alex Kolarski

The wxbase is the framework library that Rainlendar is using so the information doesn't help tracking down the bug. If you'll be able to get the dump file for the crash I'd be interested in taking a look at it.
