
Weather data can not be downloaded

Posted by wolfsina - 2012/08/28 09:55

I download Shadow4 addon , Weather as default setting can not show any data.I follow the instruction to change city to Guangzhou-China using url "http://weather.msn.com/RSS.aspx?wealocations=wc:CHXX0037&weadegreetype=C" .It also does not work. How can I do?

Welcome to the forum, wolfsina.

That way was for the MSN Weather window.

The version 2.10 uses Google Weather.

You only need to enter the city name (in your case try "Guangzhou, China")

But looks like in the last days the Google site isn't working. See

Yes, it does not work!Showing

We're sorry...

... but your computer or network may be sending automated queries. To protect our users, we can't process your request right now.

How can we do?
