## Weekdays problem

Posted by Petitours - 2007/01/14 06:21

---

Hi all,

I am trying to do a vertical calendar for Rainlendar2.

But i have a problem with the weekdays, all days appears correctly except the last one (the sunday):(

What is the probleme ?

Thanks

Probably a bug. Can you post a screenshot?

Yes, you can use a font too but I doubt that it will make any difference. Open the calendar's xml-file and change the appearance's element attribute to point to a font in the <weekdays>. You probably want to abbreviate the weekday names too.

```
<weekdays>
  <appearance element="font.normal" abbreviate="1" align="CENTER" />
</weekdays>
```

Thanks, this is exactly what I wanted to have ;)

But the probleme with Weekdays-english.png is quite strange ...

A good tip for the help file or a tutorial :)
