
Event List - Scale / size upwards

Posted by modzu - 2012/09/10 01:51

It would be nice to be able to size the event list upwards so that it could be placed in the lower part of the desktop.

Right now, if the event list is placed near the bottom of the desktop, if there are too many events they will be hidden from view..

This is strictly an aesthetic request but it would be very nice to have my event list at the bottom of my screen, and grow upwards as there are more upcoming events

The function you want was already exist, please try this:

Go to: Options... -> Skins -> (if need) click the "Advanced >>>" button -> Select the window (Event List) from the active (right) side -> Click "Settings..." button (or double-click the "Event List" item) -> Checked "Grow upwards".
