## A small game \"Number Puzzle\"

Posted by anoob - 2012/09/23 09:42

---

For celebrate join the forum two years, I released a small skin "Number Puzzle", created by myself.

This skin is just a small game, purely for fun. Hope you enjoy.

A small game or a little idea could became something bigger. ;)

You did a good job, and I was thinking some things you can improve:

Instead of 4 buttons you can use 16 buttons with the number as image, and a variable to keep where is the hole. If you click at +/-1 from hole (x or y) move button and refresh hole location.

Also, when I play, I noticed that doesn't matter where's the empty hole at the end, but is usual to put it at the lower right corner. (maybe replacing "" with " "?)

P.S.: 2 years??? time flies :P

@Lou: Thanks.

@Jorge\_Luis:

Instead of 4 buttons you can use 16 buttons with the number as image, and a variable to keep where is the hole. Yes, I can do that. But I think only need 4 buttons, because the other buttons will not take any action. So, at current, I don't want to change it.

Also, when I play, I noticed that doesn't matter where's the empty hole at the end, but is usual to put it at the lower right corner. (maybe replacing "" with " "?) Right, it's one of my lazy, I had modify it.
