
Default mouse focus on \'search\' requested

Posted by rhino - 2012/09/23 22:36

When opening 'manager' , text entry focus should be by default on 'search' text box, because you'll be typing there anyhow, and right now it's an extra wasted mouse click.
not a major feature but a nice usability addition. After all, most RL users are power users and we love keyboard, right?

I guess that's the logical place for the initial focus. I'll change it.
