
Can't change opacity

Posted by JediBrooker - 2012/10/04 13:01

Is there any reason why my 2 opacity sliders in the options are greyed out and can't be changed from 100%? I'm using Rainlendar 2.1 on Ubuntu 12.04 with the ChromophoreLou skin.

Also, as a side note, the tray icon won't show either.

Cheers!

Welcome to the forum, JediBrooker.

The opacity option has been dropped for the Linux systems. Check this post
