
How to import automatically to google calendar?

Posted by kaikoala - 2012/10/08 18:01

Hi,

i'm using rainlendar pro 2.10.

Is it possible to import my appointments automatically to google calendar?

I can import the google appointments easily, but how can i do it in the other direction, without import the ical file everytime manually.

Thx

Kai

You want to add a Google-Calendar to Rainlendar. Not a local ical one.
