## Why are tasks (at least Google Calendar) private?

Posted by capturable - 2012/10/09 08:57

---

Hi,

"Private" is set and greyed out when I add a task. I'd like to have it public, because I want to have it visible for other people.

Is there any philosophie behind it?

Thanks!  
Michael

The tasks in Google don't have any private/public status.

Ah well I see, and Rainlendar reflects that in it's GUI. Great, thank you!
