## more todo lists

Posted by lonerpl - 2012/10/10 06:47

---

hi,

I tried to create 3 different todo lists. Each one is from different calendar. When I changed in skin's option which calendar should be use, soft couldn't remember it. In options there is chosen some other calender and my changes doesn't work. I use skin shadow4.

I also tried to use categories to create 3-4 todo lists, but above 2 problem is the same as with different calendars.

Welcome to the forum, lonerpl.

Are you using the latest released version (b120) ?

There is a known problem found in b120, and has been fixed in next beta build.

So, you can wait the next released version, or download the latest beta build (Rainlendar 2.11 BETA build 124) to use:
