## Annually recurring all-day event display issue

Posted by blackhawk - 2012/10/17 08:51

---

I have an all-day event in a google calendar that occurs on 31/10/2010 and is set to recur annually.

The initial event displays correctly in month view (Shadow 4) but all recurring events display across two days (31/10-01/11). If I change the event date to 30/10/2010, all events display correctly.

The event also displays correctly in the other calendar views (including week view, which is similar in style), just not month view. I've attached an ICS containing the event and a screenshot of the problem.

Has anyone else experienced this?

Win XP Pro SP3 32bit, Rainlendar 2.11 b125 (this problem occurs in the latest stable release too).

Probably some issue related to the daylight saving time. I'll check that.

Thank you Kimmo!

Long-time pro user here - love the software, keep up the great work!

Hi,

I'd like to report another problem, which is maybe connected.

I've set up a yearly recurring event for October, 28th which is displayed with a duration from October 28th till October 27th. There's no problem creating the event at October, 29th.

Hope that helps to find the bug ;)

Kind regards <http://www.rainlendar.net/cms/images/fbfiles/files/Default-120db34f89a18f5d03e99507617f9140.ics>

That is another DST issue. I'll fix it.
