
Can't send bang to Rainmeter

Posted by DaveG - 2007/01/15 11:56

Not sure why,
But for some reason, when I try to send ...

"C:\Program Files\Rainmeter\Rainmeter.exe" !RainmeterResetStats

To Rainmeter, I get an error box to say that it can't send a Bang because Rainmeter isn't running (but this is when Rainmeter IS running!)

Any ideas?

Thanks.

Make sure that you have at least one Rainmeter window that is not set to On Desktop. Otherwise the windows cannot be found.
