## which skin is this?

Posted by Snippetz - 2012/10/23 22:14

---

I recently encountered some weird error with my windows after a BSOD error. When the computer restarted rainlendar for some reason reverted back to default skin.

In the screenshot is my old skin which I can't seem to figure out where or how I configured it. It looks like the chromophore skin except much bigger with visible text, exactly the way I liked it.

The skin is partially obscured by another window, it was the only screenshot I could find of the skin.

Welcome to the forum, Snippetz.

Isn't that the Month View from Chromophore (not the Calendar View)?
