## Possibility of Google Calendar events storage

Posted by Guybrush85 - 2012/11/05 18:47

---

Hi all,

I have a Rainlendar2 Pro license, I bought it because I use Google Calendar and I found very useful to have Rainlendar synchronized with GCal.

Everything works fine, in both ways, the events created in Rainlendar are passed to GCal and I see them on my smartphone too.

My question now came out once I found myself to use my laptop in an environment without internet connection: no events from GCal (actually all...) were displayed.

So, is there a possibility to store the GCal events once Rainlendar is refreshed, in order of having those events in Rainlendar even if I boot my laptop without internet connection?

Thank you very much!

Kindest Regards,  
Marco

Welcome to the forum, Marco.

You can keep an offline copy.

Right click on a window -> Calendars -> select your Google Calendar on the list -> in the options frame below, check the option "Keep offline copy".
