
Problem with google Agenda and rainlendar

Posted by jethro2106 - 2012/11/13 08:19

Hello,

I just tried to connect my google agenda with rainlendar and just getting this error : (35) 0 Wrong when connecting with ssl.

If anyone had an idea...

I have the same problem. Everything was working fine on both my computers, and suddenly I got this message on one of the computers with both google accounts. My other computer has no problems.

Can somebody help me?

The error usually happens if your firewall prevents Rainlendar from accessing the internet so you should check that the application is not blocked.
