
Rainlendar 2.11 BETA build 126

Posted by Rainy - 2012/11/18 06:45

Build 126 can be downloaded from here:

Windows (32-bit): Rainlendar-2.11.b126-32bit.zip
Windows (64-bit): Rainlendar-2.11.b126-64bit.zip
Linux TAR (32-bit): Rainlendar-2.11.b126-i386.tar.bz2
Linux DEB (32-bit): rainlendar2-pro_2.11.b126-1_i386.deb
Linux TAR (64-bit): Rainlendar-2.11.b126-amd64.tar.bz2
Linux DEB (64-bit): rainlendar2-pro_2.11.b126-1_amd64.deb
Mac OS X (Intel): Rainlendar-2.11.b126.dmg

MD5SUMS-b126

The widget addon: Shadow4-Widgets.r2skin-addon

POT file for localization: rainlendar2.pot

This is beta version! It has not been tested.

Changes:

- o Added sort button to the new manager dialog.
- o If reading the event data from the CalDAV server fails Rainlendar tries to do it with a different method.
- o Ctrl+Enter accepts and closes the event and task editors.
- o All day events were not shown correctly if they were set on the day when DST changed.
- o New operating system specific tray icons. The icon can be changed from the skin's settings.
- o The recurrency status for tasks and events can be shown in the tooltip.
- o Added context menu to the manager's event list.
- o New categories for the skins: Pets, Car, Theatre and Music

Win 7 x64 BUG:

1. Crashed when display "in progress" tootip in manager
2. Task can not change to "Completed"

Some question:

1.

What's difference between Show current and Show original? I use it and display the same result. Does Show current

mean show today items?

2.
I can't find "Use app indicator icon", and what is this function?

3.
What is "Use custom password encrypting" function?

Lost strings:
Large calendar

Question 1.

For a weekly recurrent event starting on Nov 12, this would be the "Original" date, Nov 19 will be the "Current" date and Nov 26 will be "Upcoming" date.

2. I suppose that's because is not a Windows option. I couldn't find also. (maybe related to <http://unity.ubuntu.com/projects/appindicators/>)

What is "Use custom password encrypting" function?

Rainlendar 2.11 BETA build 123 :

o Changed the password encoding to use the operating system services.
explains ?

Rainy wrote:

The change means that instead of encoding the passwords with a proprietary algorithm Rainlendar now uses the operating system's crypto library to do it. So, it's more secure.

BTW, manager's search function now can search Summary field only.
Old one can search in any field. Is this a bug?

Old one can search in any field. Is this a bug?

You can filter by category searching, e.g., "category:work"

The search function should work for all fields by default so it's a bug. I'll fix it.

1. Crashed when display "in progress" tooltip in manager
The bug will be fixed in the next build.

2. Task can not change to "Completed"
I'm not able to reproduce this. What kind of task was it?

Just normal task, I printscreen the alert.

<http://www.rainlendar.net/cms/images/fbfiles/images/tastcrashed.jpg>

If I select cancel, it can change to "Completed" before restarting the program again.

Re:Rainlendar 2.11 BETA build 126

Posted by Rainy - 2012/11/27 11:16

I think that assert comes if the task doesn't define a due time. It should not happen anymore in the next build.
