
Rainlendar v.2.11 (b126)

Posted by jokr - 2012/11/18 11:31

I still miss speech bubbles in the calendar. I would like to see the contents of the appointment if the cursor points at the day (the number of the day).

I believe, in the old version there was this? :)

I using the same system with you, Win XP SP3, and the speech bubble is working fine on my PC.

So, maybe you missed some setting. Please check you have did:

1. Options > Advanced > checked "Show tooltips" that at Tooltip session.

<http://cdn0.qo000.com/img/3/23079-2.png>

2. Options > Skins > Activate the "tooltip" window.

<http://cdn0.qo000.com/img/3/23080-2.png>

Thanks for your suggestion, but the settings seem to be correct. No idea what's wrong here... :S
