
Same priority level of Tootledo

Posted by Mar - 2012/11/24 08:30

Is it possible to include more one priority level (level 3 - Top)to become Rainlendar more compatible with Tootledo ?

Tootledo has 5 level of priority (-1, 0, 1 ,2 ,3). Rainlendar has only 4 (-1,0,1 and 2)

Thank you,

Sidnei

The icalendar standard supports priorities from 0 to 9 so adding new values is possible at least in theory. In practice the problem is that usually different 3rd party calendars only support 3 priorities (or 4 if you count the "no priority") which creates problems if the tasks are moved between the calendars. But I'll think about it.
