
[Solved] QuickAdding not working.

Posted by brianoh68 - 2012/11/26 08:02

when I make new schedule or task with Qucikadd, rainlendar stop and disappear. but when I make new schedule or task in Calendar, Schedule, To do window with mouse right click, rainlendar working correctly.
Please advise me what must be checked. Thank You.

After clicking default.ics, rainlendar working correctly.!!

Today I found rainlendar conflict with outlook 2013. this version support outlook 2013?

outlook-> rainlendar ok.
rainlendar-> outlook not working.
please someone help me~~
What do I check?

<http://www.rainlendar.net/cms/images/fbfiles/files/rainlendar2-2245257a78d9447684df1a01b6ba47a4.log>
Thank you for your response.
rainlendar.log file attached.
what must be changed?

In user\.rainlendar2\ directory, Only backup folder can be seen and locale and skin folder are not shown.

According to the log Rainlendar can access the Outlook's appointments and read them. Did you try to create a new appointment in Rainlendar when you made the log? I don't see any errors related to it. Do you get some error message when you create new appointments or what exactly happens?
