1) is rain able to set individual reminders?

rememberthemilk seem to be set reminders globally to all tasks, "If the task has a due time, remind me..."

you can either

"At the time the task is due"

"X mins before the task is due"

2) how do you import rtm tasks to rain?

---

1. Yes.

2. You can export the tasks in icalendar format and import the file to Rainlendar. Rainlendar Pro can also read the tasks directly from RTM.
