
Export to Google calendar

Posted by Anjistar - 2012/12/01 12:27

Hi, I'm new to Rainlendar.

Is it possible to export events to Google Calendar, rather than just being able to import them?

I usually only use a desktop calendar, but need something my partner can access at work, so must link it somehow.

However I am lazy and don't want to re-enter all the info I have on Rainlendar again in Google.

Thankyou

Angie

Welcome to the forum, Angie.

You don't need to create again all the events. You only need to open the Manager, select the events you want, then select File -> Export -> iCalendar Format. Save the file.

Later, on Google Calendar, go to Settings, then, select the Calendar tab. Click on Import Calendar, look for the previously saved file, select where to import them, import and done!
