## More Keyboard Shortcuts / Ease of Use for Keyboard

Posted by Poleris - 2007/01/17 14:53

---

Hi -

Would it be possible to implement more keyboard shortcuts? The largest one is a keyboard shortcut to get to the manager in event mode and a keyboard shortcut to get to the manager in todo mode.

Thanks.

I'll check if it's possible to e.g. to add a custom parameter to the Rainlendar\_OpenDialog() function. That could be used to determine which list the manager shows.
