
KISAI Clocks by TokyoFlash

Posted by Jorge_Luis - 2012/12/08 09:10

I'm creating a new skin with clocks based of these from "KISAI Clocks" by TokyoFlash.
These are weird ones, by the way. You need a manual not for setting the time but for read the time itself :woohoo:

It's an initial version. I will try to add more clocks from the collection and/or add buttons to show the date in the way the clocks shows it (if possible).

Thanks!

I remade the JLR7... and I'm trying to add more clocks. At least I have 2 more...

EDIT: I update the deviantART file to show the new changes. I need to change the name because I'm not sure if all watches are from KISAI (at least, one is from SEAHOPE).
