## To-do list order, fonts, window size

Posted by writ - 2007/01/17 22:01

---

Dear Support,

1) When I add a new item in the to-do list, it would automatically arrange it in alphabetical order instead of in the order of date added as in the original Rainlendar. How do I change this?

2) How do I change the fonts in Rainlendar. I looked in the xml file and the font configuration looks something like this

"TodayFont=-19/0/0/0/700/0/0/0/0/3/2/1/66/French Script MT"

which I do not know how to decipher.

3) Is there a way to change the dimensions of the to-do list and event windows?

Thanks,  
writ

but there must be a Startdate/time at each To-Do item.

2) How do I change the fonts in Rainlendar. I looked in the xml file and the font configuration looks something like this "TodayFont=-19/0/0/0/700/0/0/0/0/3/2/1/66/French Script MT" which I do not know how to decipher. Just rename the font name in the exact fontname you want.

3) Is there a way to change the dimensions of the to-do list and event windows? Rightclick Trayicon > Options > Skins > Active skins (section) > Select Event list (or Todo list) > Settings > Eventlist height / Eventlist width (or Todo list height / Todolist width)

thx, but

Rightclick on To-Do list > Todo list > Arrange > By Start Date

but there must be a Startdate/time at each To-Do item.

So can you confirm for me that there's no way to sort it like in the original Rainlendar by the date added (without needing to take all that effort to put in a start date?)

Thanks  
G C

to take all that effort to put in a start date?

In the ICS-file there is a DTSTAMP with the date the task was added and a DTSTART with the Startingdate when it is entered.

AFAIK there is no way to sort on DTSTAMP, only on DTSTART.

Rainy,

Is it possible to add the Date Added to the ToDo-window and a possibility to sort on Date Added?

I'm currently implementing a possibility to use custom order in the todo list so you can arrange the list any way you like.
