
Rainlendar & Windows 8 with Stardock Start 8

Posted by bobbylyons - 2012/12/10 13:57

If a user has Windows 8 and also uses the Stardock Start 8, which allows one to have Windows 8 and still show the start button and the traditional Windows 7 look and feel, will Rainlendar still work as always in that environment? ... meaning without the Metro icons?

I haven't tried but I would think it works since Rainlendar does not have any dependencies to Metro.
