## \ "DEVON Tread 1 watch\" for Rainlendar2

Posted by Jorge\_Luis - 2012/12/14 22:36

---

It took me several days, but after all, I could made a "something-like-that" version of the Tread 1 watch from Scott Devon, except no animation. The real clock works with a couple of engines and rubber straps! :woohoo:  
It's not a cheap watch... only 15.000 USD... :P

:woohoo: impressive, well done !

but too big...

I need a image of the clock to made the cover.  
By the way, it could be scaled in the options.
