## take out the garbage reminder needed.

Posted by warren631 - 2012/12/22 15:13

---

I'm looking for a weekly alarm clock to ring each monday evening to remind me to take out the garbage. I downloaded and installed Rainlendar Lite  
Version 2.10 (b120) 32 bit Build on Jul 2 2012 on Win XP home.

Nice program with plenty of options, but I can't do the simple thing I need. The audible file needs to be selected for each event (can't set a default audio file), the audio file only runs once and then - silence. I need it to keep ringing until I silence it - just like a real alarm clock so I don't miss it.

Now the audio alarm has stopped working - just silence..... My Win Media Player plays the file OK, my Skipe works fine. But the fancy Rainlendar is silent.

You can change the default alarm audio from Options->Advanced->"Default alarm file". The alarm can be made to loop from Options->Advanced->"Loop the alarm sound". Audio files which are in wav format work the best so if the file doesn't play try converting it to wav.

Thanks for the reply.  
I found where to enter a default sound file and it works fine,  
but I couldn't find: Options->Advanced->"Loop the alarm sound".

It's the second last setting in the advanced options.
