Welcome to the forum, cactus.

Here is "Shadow4_Widgets.r2skin-addon for 1.9" (include MSN_Weather) :
<http://www.rainlendar.net/download/1.9/Shadow4-Widgets.r2skin-addon>
And, from b120, lua update to 5.2, so also need download a fix addon:

thanks for help.i still have some problem.
one is idont know how to use the skin "Shadow4_Widgets.r2skin-addon for 1.9".it doesnt shows on skin options.
second is i have trouble on getting the weather woeid.my location is Guangzhou,China .i input Guangzhou in the box weather woeid,and one shows error that cityname cannot find.the other one works strange.

Oh! Because my English is not good, so I will email you and use Chinese to answer your question.

Added: (to anyone who want to know what happens)
Basically, the problem occurs at :
the same time enable different skin's weather window,
and the part weather window has calling the same function.
