## Rainlendar Pro crashes with Outlook calendar

Posted by prain - 2012/12/27 12:53

---

I have Rainlendar Pro 2.10 and Outlook 15 (2013). When I try to add a event or task or edit an event or task in Rainlendar to the Outlook calendar, Rainlendar crashes.

Rainlendar does not crash if I add a event or task to the default calendar.

I am attaching the debug file. [http://www.rainlendar.net/cms/images/fbfiles/files/rainlendar2\\_12272012.zip](http://www.rainlendar.net/cms/images/fbfiles/files/rainlendar2_12272012.zip)

Try the new version 2.11. It should support the latest Outlook better.

I installed the new version and everything is now working, thank you.
