## Found Korean translation error.

Posted by hyeokje - 2012/12/28 16:49

---

When I try to enter Option menu, this image appears.

[http://www.rainlendar.net/cms/images/fbfiles/images/2012\\_12\\_29\\_073334.png](http://www.rainlendar.net/cms/images/fbfiles/images/2012_12_29_073334.png)

File

```
#: Application/Config.cpp:1409 Application/Config.cpp:1634
msgid "Hide dismissed events"
msgstr "À~ | (00"
```

```
#: Application/Config.cpp:1410 Application/Config.cpp:1635
msgid "Hide past events"
msgstr "À~ | (00"
```

Like above, maybe translation conflict? Sorry for poor English and thanks for great application :)

Found a solution with poedit !

```
#: Application/Config.cpp:1409 Application/Config.cpp:1634
msgid "Hide dismissed events"
msgstr "À~ | (00"
```

change to:

```
#: Application/Config.cpp:1409 Application/Config.cpp:1634
msgid "Hide dismissed events"
msgstr "t° | (00"
```

There's no error when entering Option menu,  
But still I can't see past events in Event list window.

Welcome to the forum, hyeokje.

But still I can't see past events in Event list window.

Go: Options > Advanced > drag down to "Event List" session > Change the value of "Number of past days the list shows" to what you want.

Sorry, it seems is a bug on b128.

Because I always not to show the past events, so I not found it.
