## Where to search for ics files?

Posted by Kea - 2013/01/10 07:52

---

Hi,

I can't seem to find the ICS files of my old calendar software. I used Lightning (an addon for the Thunderbird email client). I've search the Lightning Install folder, and my C drive index for .ics files and have come up empty. Any idea where those files are hidden away on a Windows 7 32 bit computer?

Thanks

=====

I did not use Lightning, I search with Google and found it default format is ".sdb"(SQL-base) instead of ".ics", although it can read(open) ".ics".
