## Individual snooze/dismiss buttons

Posted by Kea - 2013/01/12 19:44

---

Hi; I know you can right click to individually dismiss an alarm, but this is cumbersome because it causes the program to reset. It would be nice if individual dismiss/snooze buttons were added to each alert for better control

That depends on what skin you are using. E.g. the Shadow4 skin has individual snooze and dismiss buttons for each event (the functionality is the same as using the menu though).
