
Progress?

Posted by kagechuang - 2013/01/16 12:50

Why I can't add status percentage in tasks?

I even can't type Location, change tasks to public, and show in calendar

and can't choose what category I want..

is there have any problem on my rainlendar?

should I reinstall ? because I just upgrade it from Pro version 2.1.0 Build 120

and don't know how why this happen

Welcome to the forum, kagechuang.

You are using

which version (is the latest)?

which skin (is Shadow4)?

which calendar (is the Default)?

only at tasks? or events also the same ?

If you describe a little more or attached some screenshots about your problems, it will more clearer that let people to know what your problem are.

If the fields are disabled it means that you are using a 3rd party calendar for the tasks (e.g. Google Tasks) which does not support the fields.

ok, I get it, because Google Tasks doesn't support progress

so I can't use this function in Rainlendar

still looking another program that can support progress and category and sync with Rainlendar ..

any suggestion?
