
synchronize with apple iCloud?

Posted by Joshman - 2013/01/20 12:07

Is Rainlendar pro able to synchronize with Apple's service and a calendar I've created in iCloud? In other words, will it work with Mac calendars? Thank you.

Welcome to the forum, Joshman.

There are previous questions about iCloud in the forum. I don't have Apple, but check if this works for you:

Typing in the calendar URL, username and password might allow me to subscribe to the icalendar. However I want to be able to write/post to the calendar too. Is this possible? Thank you.

CalDAV supports also writing the events to iCloud.
