
Manager is not searching full texts anymore !!!

Posted by marcelo.betel - 2013/01/21 06:56

PLEASE, I need that old search style as soon as possible.

I don't know WHY you changed that. In fact, I can't imagine a good reason for that modification...

In this 2.11 version is not possible find a specific word in text window of a ToDo file.

PLEEEEEEEASE.... :unsure:

The possibility to search also the descriptions is planned to be added back in the future versions.
