
Any chance to compile for Surface RT?

Posted by derausgewanderte - 2013/01/22 17:39

still loving it on my desktop running windows 8. I recently purchased the MS Surface RT and I am wondering if there is any chance running rainlendar on the Surface RT? It would have to be compiled for ARM. Reading on XDA-Developers forum this shouldn't be too difficult provided the owner is willing to do it.

just curious
thank you

That is highly unlikely. I can reconsider this if Microsoft ever decides to allow desktop applications in RT but as long as you need to jailbreak to run them it's just not worth the effort.

thank you for the reply and clarification. I understand your point.
cheers
