## Any chance to compile for Surface RT?

Posted by derausgewanderte - 2013/01/22 17:39

---

still loving it on my desktop running windows 8. I recently purchased the MS Surface RT and I am wondering if there is any chance running rainlendar on the Surface RT? It would have to be compiled for ARM. Reading on XDA-Developers forum this shouldn't be too difficult provided the owner is willing to do it.

just curious  
thank you

That is highly unlikely. I can reconsider this if Microsoft ever decides to allow desktop applications in RT but as long as you need to jailbreak to run them it's just not worth the effort.
