What version you are using? If you are on Linux you need to change the appindicator icon to a normal tray icon (i.e. disable Options->Advanced->"Use app indicator icon")

Sorry to take so long to reply. I have been away. I am using the latest version with windows xp. The error message does not show over the tray icon. I would find it useful if that feature was working. Thanks

Great!

Thank you very much. I look forward to it.  
Love the program.... in use all the time  
Thanks

Llewellyn
